

Dear Members of Commerce Committee,

I am writing to ask that you please vote NO to HB5263.

In this, the 21st century, how is promoting factory farming of RABBITS promoting farming and agriculture in our state?

We are Connecticut, a state that values education, forward thinking, and ethical and humane business and agricultural practices. As other industries move away from rabbit testing and consumption this bill would be a step backward, not to mention an embarrassment, for our state.

Please vote NO to this horrific bill.

Sincerely,

Deborah Fox
